

PRODUCT REVIEWS

Designed specifically for rosacea patients, the **Obagi Rosaclear System** reduces the appearance of redness while treating rosacea-related papules and pustules. The prescription-strength skincare system includes soothing

Gentle Cleanser; Metronidazole Topical Gel USP, 0.75%; Hydrating Complexion Corrector, a moisturizer with calming agents and light-reflecting minerals to reduce the appearance of redness; and chemical-free Skin Balancing Sun Protection SPF30 (sold separately). Contact: **800.636.7546**, www.obagi.com.

Designed for fashion-conscious vein therapy patients, **SIGVARIS EverSheer 20-30mmHG Medical Compression Hosiery** features an advanced knit construction to provide a sheer and fashionable look. Double-covered inlay yarns make it easier for patients to put on the garments and add durability while still offering breathability

and moisture management. Contact: **800.322.7744**, www.sigvarisusa.com.

Eau Thermale Avène **TriXéra+ Selectiose Emollient Balm** was formulated to combat all symptoms of atopic dermatitis and restore the skin barrier. Used daily on very dry, intolerant skin, the fragrance-free, paraben-free balm reduces skin hypersensitivity; soothes irritation and inflammation; relieves itchiness; and restores the skin barrier with ceramides, sterols and essential fatty acids. Contact: **866.412.8363**, www.avenusa.com.

Transderma C Vitamin C Serum from ProBios Laboratories warms on application to dilate pores for deep absorption of vitamin C. The hypoallergenic, noncomedogenic serum improves skin firmness, luster and elasticity while protecting against UV exposure. Contact: **954.281.8682**, www.probioslaboratories.com.

Developed jointly by a physician and a licensed skincare expert, DeLaine by Michelle Douglas **Tea Tree Oil Cleanser and Acne Masque** gently fight blemishes while calming irritated skin. The anti-inflammatory, botanical-based cleansing gel removes impurities and unclogs pores, while the antiseptic and anti-inflammatory masque features soothing botanical ingredients to absorb excess oil and impurities. Contact: **888.632.8222**, www.michelledouglas.com.

Priced at less than \$50,000, the **MOSAIC CO₂** fractional CO₂ laser system includes scanning and stamping operation modes with patented Controlled Chaos Technology to minimize burns. Speed of treatment, lesion depth and beam patterns are optimized for clinical effectiveness, and the system requires no consumables. Contact: **888.588.7644**, www.lutronic.com.

The Iridex **VariLite Dual Wavelength Laser** utilizes 532nm and 940nm wavelengths to effectively treat vascular lesions, benign pigmented lesions, cutaneous lesions and acne vulgaris. The semiconductor-based system allows easy toggling between wavelengths to treat both superficial and deep, larger veins, and requires no disposables. Contact: **800.388.4747**, www.irdex.com.

DermaQuest eyelash-enhancing **Eye Makeup Remover** combines biotin and copper to strengthen and hydrolyzed wheat protein to condition lashes while cleansing. The remover features a spill-proof and easy-to-use pump-top lid. Contact: **800.213.8100**, www.dermaquestinc.com.

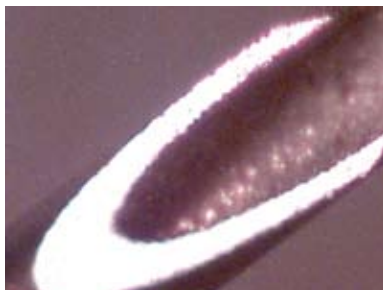

Pigment Regulator multi-action treatment from SkinCeuticals promises efficacy equal to 4% hydroquinone formulations without the potential for adverse reactions. The treatment includes precise concentrations of kojic acid and emblica to diminish existing discoloration plus exfoliating agents to help reduce blotchiness and improve skin radiance. Contact: **800.771.9489**, www.skinceuticals.com.

Jan Marini **Age Intervention Regeneration Booster** combines telomerase enzyme with anti-inflammatory agents and select peptides to reduce the signs of aging. The skin booster is used in six-week cycles to help preserve telomeres and prevent skin aging. Contact: **800.347.2223**, www.janmarini.com.

Designed specifically for higher viscosity and microparticle dermal filler injections, Air-Tite Products **TSK Ultra Thin Walled (UTW) Needles** offer increased flow at lower pressures. The thin walls of the needles allow physicians to use a smaller diameter—27 gauge or 30 gauge—needle in place of a 25 gauge needle for improved patient comfort. Contact: **800.231.7762**, www.air-tite.com.

Heal and preserve skin following CO₂ and fractional CO₂ resurfacing treatments with the **Ablative Post-Procedure Kit** from SkinMedica. The kit includes Restorative Ointment, Sensitive Skin Cleanser, Ceramide Treatment Cream and oil-free Environmental Defense Sunscreen SPF 30+, a full-spectrum moisturizing sunscreen. Contact: **866.867.0110**, www.skinmedica.com.
