

INTRODUCTIONS

01

01. BREAKTHROUGH ANTIAGING CREAM

Launched by Telomolecular Corp., bim-e-ne uses nanoparticles to carry Type III collagen directly to the dermal layer. "This is a revolutionary face cream—a product so innovative, we believe it could generate enormous consumer interest," says David Dollar, senior vice president. The product also contains hyaluronic acid, pentapeptides and a penetrating form of vitamin C. Contact: 530.878.4995, bimene.com

02

02. FOR SUN WORSHIPPERS

Dermatologic Cosmetic Laboratories introduces UVA/UVB Chemfree Superblock SPF 30. Designed by dermatologists, it incorporates highly micronized particles that distribute evenly over skin and protect it from a complete range of harmful rays. "Chemfree Superblock SPF 30 combines two of the best sunscreen ingredients in an ultra-micronized, cosmetically elegant formulation that delivers optimal coverage, water resistance and protection without the white residue," says Dr. Neal B. Schultz, senior vice president and clinical medical director. Contact: 800.552.5060, dclskincare.com

03

03. PORTABLE LASER

The V-Raser diode laser from HOYA ConBio is a portable device that can effectively treat vascular lesions. Weighing only 4 pounds, the 980nm diode laser targets common red and blue vessels, including facial telangiectasias. Variable spot sizes allow the device to treat small, hard-to-reach areas such as the crevices and sides of the nose. "The V-Raser is uniquely successful in removing a variety of facial vessels with minimal patient discomfort," says David Goldberg, MD, director, Skin Laser & Surgery Specialists of NY/NJ and clinical professor of dermatology at Mount Sinai School of Medicine. "And, it's the smallest laser I've seen." Contact: 800.532.1064, conbio.com

04

04. FAST FIX

To help soothe and heal patients' skin following laser resurfacing, a chemical peel or microdermabrasion, consider Fast Skin Repair by Mesoesthetic USA. It contains alpha-glucan, DMAE, botanical extracts of borage oil and licorice, idebenone, alpha lipoic acid and UVA/UVB filters. Fast Skin Repair is suitable for all skin types, including very sensitive and damaged skin. Contact: 888.498.3842, mesoesteticusa.com

INTRODUCTIONS

05

05. SAY GOODBYE TO ADULT ACNE

Jan Marini Skin Research Age Intervention Transitions treats adult acne as well as fine lines and wrinkles. The product's active ingredient is 1% salicylic acid.

"Many people experience transitional skincare issues as they age, including

adult acne, fine lines and the effects of cumulative sun exposure," says Jan Marini, president and CEO. "I created this revolutionary formula to address these common conditions that plague a huge percentage of adult females." Contact: 800.347.2223, janmarini.com

06

06. SKIN TLC

Help soothe, cool and restore patients' skin after treatments with Avène's new S.O.S. Post-Laser recovery kit. This doctor-recommended at-home kit includes: Thermal Spring Water, which soothes inflammation, itching and redness; Thermal Spring Water Gel, a sterile gel that instantly soothes skin discomforts after laser procedures; and Cicalfate, an advanced skin recovery cream. Contact: 866.41.AVENE, aveneusa.com

07

07. ANALYZE THIS

The new Mobile Skin Analyzer from MSApro measures skin texture, sebum, pigmentation, keratin, elasticity and brightness. Developed by Moritex and True Systems, it contains two sensors for measuring moisture levels in the stratum corneum and a 50x PL lens for observing texture and pigmentation in detail. Contact: 877.261.2100, moritexusa.com

08

08. BEST OF BOTH WORLDS

Offer patients the newest in laser technology with the Ellipse Juvia, which combines fractional and full ablative functionality into a single CO₂ laser system, giving you total control of the treatment. The fractional approach ablates isolated columns so that the skin that remains forms a solid foundation for fast healing. The puncture wounds result in a significant increase in collagen and cell production. "With one pass, we can significantly improve dyschromias, texture and fine wrinkles. With two or more passes, we see some nice improvements in the deeper wrinkles and with only four to six days of recovery," says Dr. Thomas Fiala, MD, of the FACS. Contact: 877.355.4771, ellipse.org

09

09. NEW FORMULA

Treat acne-prone skin with NEOVA Matrix AR by Procyte, the first topical formula created with patented retinol technology. Ingredients include Hydropinocalone retinoate, butylene glycol, glycerin and hydrogenated lecithin. The lightweight formula has been clinically proven to gently heal problem skin in half the time of its retinol-based competitors. Contact: 888.966.1010, photomedex.com
