

INTRODUCTIONS

01

01 REVERSE SUN DAMAGE

The three-step Kinerase PhotoFacials Sun Damage Reversal System was designed to offer patients similar benefits to an in-office photofacial through the use of a topical homecare regimen. The system addresses mottled pigmentation, rough texture, and fine lines and wrinkles with three products: Daily Exfoliating Cleanser, Day Moisturizer with SPF 50, and Night Moisturizer. Ingredients include kinetin, antioxidants, fruit enzymes, natural skin lighteners and a patent-pending ozone protector to repair environmental damage. Contact: 800.321.4576, www.kinerase.com.

02

02 IMPROVED TEMPERATURE MONITORING

Sciton introduces TempAssure, a temperature sensory accessory for laser-based treatments that accurately measures tissue temperature in real time. TempAssure monitors changes in tissue and body temperature and indicates fluctuations through light and sound. "TempAssure is the state-of-the-art in temperature monitoring for the higher power laser lipolysis procedures," says Marc Salzman, MD, Louisville, Kentucky. "It allows for direct feedback of temperatures at all levels of the laser application for increased safety and efficacy." Contact: 888.646.6999, www.sciton.com.

03

03 FULLER, THICKER LASHES

After helping to launch the trend of eyelash-enhancing products, Revitalash is expanding its offerings with the new Mascara by Revitalash. The high-performance, clump-free formulation delivers thicker, fuller-looking lashes with the help of a custom-designed brush that separates and defines the lashes during application. The mascara can be used in conjunction with the original Revitalash Eyelash Conditioner. Contact: 877.909.5274, www.revitalash.com.

04

04 REVITALIZE AGING SKIN

Tretinoin-based Refissa cream from Spears Dermatology Products is FDA-approved for the treatment of fine lines and wrinkles, hyperpigmentation, and tactile roughness. The fragrance-free, emollient-based cream features 0.05% prescription-strength tretinoin and requires no additional moisturizer. It is indicated for mature patients with normal to dry photodamaged skin. Contact 866.773.2779, www.refissa.com.

INTRODUCTIONS

06

06 HELP FOR DARK SPOTS

Patients can spot treat dark spots with the new Mela-D Serum from LaRoche-Posay. Lipo-hydroxy-acid 0.2% exfoliates skin to reduce the size of dark spots while kojic acid 1% inhibits the activity of tyrosinase to help reduce the appearance and intensity of dark spots. Glycolic acid, the final ingredient in the formulation, provides added exfoliation to help reduce the size of dark spots and create a uniform complexion. Contact: 888.577.5226, www.laroche-posay.us.

07

07 THE NEW ELITE

The new Elite MPX aesthetic laser workstation from Cynosure offers three new features to speed treatment times and improve ease of use. The dual wavelength platform combines a 755nm alexandrite laser and 1064nm Nd:YAG laser for vascular treatments, hair removal and skin rejuvenation. New features include a built-in Zimmer SmartCool skin cooling system to save valuable practice space while reducing treatments times; Xenon Pulsed Light (XPL2) technology with interchangeable filters that allow you to treat sun damaged skin, dyschromia and rosacea; and Graphic User Interface, a new graphically enhanced software system that makes the station easier to learn and operate. In addition, the Elite MPX offers eight different spot sizes with adjustable pulse durations. Contact: 800.886.2966, www.cynosure.com.

08

08 IRRITATION-FREE LIGHTENING

Lumixyl improves the appearance of hyperpigmentation with the help of a nontoxic, nonirritating decapeptide of the same name. Studies of lumixyl have shown a 50% improvement in facial pigmentation after 16 weeks of use. The physician-dispensed topical is indicated for melasma; sun spots, age spots and liver spots; photodamage; postinflammatory hyperpigmentation; and hyperpigmentation caused by systemic disease and prescription drugs. Contact: 416.944.1974, www.lumixylmd.com.

05

05 AT-HOME PEELING

Glytone Mini Peel Gel offers 10.8% free acid value glycolic acid to gently exfoliate skin for improved texture and a younger-looking complexion. The peel can be used safely at home, up to two to three times per week to prolong the results of in-office chemical peels. The gel is applied for 10 minutes and neutralized with warm water. Contact: 800.459.8663, www.glytone.com.
